

6 GREAT REASONS

TO BECOME A HYDROKLEEN™ LICENSEE

1. The HydroKleen™ system is unique and new to the international market. Several years of research and development were needed to create this process. The machine we use is strong enough to clean the dirtiest air conditioning units.

2. HydroKleen™ is an environmentally friendly company. We...

- Provide our customers with clean, healthy air;
- Reduce our customers' power consumption, thus allowing them to save money;
- Extend the life of their air conditioning system.

3. HydroKleen™ has registered its intellectual property protection in every province it operates in, which means its system cannot be duplicated by any competitor.

4. Each owner of a HydroKleen™ equipment package becomes a licence holder, he or she can therefore use the HydroKleen™ trademark to promote its services, in accordance with the agreement signed by both parties.

5. All HydroKleen licensees are continuously provided with practical information. They are given personal login information to access all of the training, marketing, merchandizing and maintenance material. These tools are updated frequently.

6. HydroKleen™ provides ongoing support and training for all licensees.
